26"	\$83.10	\$74.80	\$70.65	\$66.50

*12" & *14" True diameter wheels available for use on imported machines.

**Use Above Prices For
93FG Reinforced Wet Cutting Wheels**

FIBERGLASS INTERNALLY REINFORCED

Woven fiberglass cloth is molded in the center of the wheel for break resistance.

45FGFor general purpose cutting.

23020FGDesigned for use on machines with POWERHEAD (automatic wheel feed) where free cutting ability is needed because of constant feed pressure.

2069FGIdeal for heavier wall shapes and tubing.

T32 FG.....For cutting thin wall shapes and thin wall tubing.

GTK-7FG.....Excellent for high quality dry cuts on stainless tubing and other thin wall tubing.

FIBERGLASS EXTERNALLY REINFORCED

Woven fiberglass cloth is applied externally on both sides of the wheel for break resistance.

45FGEFor general purpose cutting.

23020FGEDesigned for use on machines with POWERHEAD (automatic wheel feed) where free cutting ability is needed because of constant feed pressure.

2069FGEIdeal for heavier wall shapes and tubing.

T32 FGEFor cutting thin wall shapes and thin wall tubing.

GTK-7FGE.....Excellent for high quality dry cuts on stainless tubing and other thin wall tubing.

93FG

Fiberglass internally reinforced cloth is molded in the center of the wheel for break resistance.

93FGPressed resin-rubber wheel; excellent for high quality wet cuts on hardened material, also wet metallurgical sample cutting. Available in most sizes.

Non-Reinforced Wet Cutting Abrasive Cutoff Wheels

Wet Abrasive Cutoff Wheels

SIZE	QUANTITY PRICE EACH			
	10	20, 30, 40	50	100

1-1/4"			W	W	W	W					DW	DW

The following rubber bonded wheels cannot be fiberglass reinforced. Use only on well guarded machines with extreme caution and personal protection.

#1410.....For wet metallurgical sample cutting. Also excellent for high quality wet cuts on hardened material and tubing. Available in most sizes.

#1115.....Calendered rubber wheel specially formulated for general purpose use on our 10" wet machine.

#1329.....General purpose calendered rubber wheel, designed for wet cutting solids, heavy wall shapes and tubing. Produces a fine cut, excellent for use on wet power head machines. Available in 14", 16", 20", and 26".

#60.....General purpose pressed rubber wheel designed for wet cutting solids, heavy wall shapes and tubing. Larger grit sizes generally produce coarser cut than #1329. Available in all sizes.

#91.....Designed for cutting nonferrous shapes-copper, brass, etc., rubber bond silicon carbide. Available in all sizes.

Horsepower and voltage codes, located throughout the catalog, provide information necessary to properly price all Everett machines and accessories.

Sever it with Everett abrasive cutoff wheels and vibra action oscillation are the key to quality large cross sectional cuts.

Horsepower and voltage codes, located throughout the catalog, provide information necessary to properly price all Everett machines and accessories.

Spiral hose is rubber coated steel, you need an Everett Abrasive Saw to cut it efficiently.
